
City of Post Falls, Post Falls, Idaho

Topographic/Location of Idaho Street (Completed 2004)

The survey started approximately 125 feet South of 10th Street and extended approximately 4900 feet to include the intersection with Poleline Avenue.

- Control survey and topographic survey to locate all of the features and improvements within the right-of-way of Idaho Street for a street reconstruction project.
- Cross sections were taken at 50 foot intervals to obtain specific data on the street curbs and sidewalks.
- Plan and profile drawings and cross section drawings (5 sheets + cover) were prepared in AutoCADD for submittal to the City Engineering Department

Stakeholders:

- City of Post Falls
