
Lakeland School District No. 272, Idaho:

The survey portion of this project included a boundary and topographic survey in support of Architectural and site Engineering design. This is an 18 acre site with some complex topography located near Twin Lakes, Idaho. We will be providing legal descriptions for utility easements as well as construction staking and as-built surveying services as the project progresses through completion.

- Involved research of records and review of old deeds.
- Control surveys for retracement of boundary survey by another surveyor.
- Deliverables included are a topographic survey drawing.
- Involved an extensive topographic survey in dense timber and brush.

Stakeholders:

- Lakeland School District No. 272

Key Staff Members:

- Scott Rasor, PLS, Project Manager
- John Howe, PLS
